

Ahmed Elnemr

Frontend Developer

✉ ahmedelnemrdev@gmail.com ☎ +201204662807 📍 Mansoura , Egypt 🔗 LinkedIn 🐙 GitHub

Profile

Frontend Developer specializing in React and Next.js ,who translates design concepts into scalable, responsive web applications. Proficient in TypeScript, Tailwind CSS, and Redux Toolkit for building clean, optimized, and performant user interfaces. Experienced in leveraging AI-powered design tools such as Stitch to independently design and build UI components, bridging the gap between design and development. Passionate about delivering fast, accessible, and maintainable web solutions

Professional Experience

Frontend Intern

06/2026 – 07/2026 | Serve5 Mansoura

- Contributed to the development of Markivia, a SaaS platform enabling companies to build their own websites with customizable pricing plans, company information, and goal-setting sections.
- Built and implemented dynamic forms for company registration, pricing plans, and business information sections.
- Developed the authentication system, including a complete Forget Password flow with OTP

ITI Summer Training Program

07/2025 – 08/2025 | Mansoura

- Completed an intensive React Web Development track at ITI (Information Technology Institute), combining online sessions with hands-on labs and daily task-based assignments.
- Served as Team Leader, responsible for distributing tasks among team members and reviewing code upon completion to ensure quality and consistency.
- Led team of 10 developers to deliver Doctor Appointment System as the graduation project, applying React concepts learned throughout the track.
- Gained hands-on experience in leadership and task coordination, balancing individual contributions with overall team progress.

Education

B.Sc. in Computer Engineering, Mansoura University | GPA 3.6/4.0 (Excellent) | 2021–2026

Graduation Project — Rafiq Health care platform : AI-powered medical analysis,online booking, video consultations, secure payments, and smart chatbot support.

Projects

Zini Admin Dashboard

- Built a role-based Admin Dashboard for Zini, a platform connecting designers and clients, featuring 7 distinct permission roles (Users, Consultations, Community, Content, Support Tickets, Billing, Audit Logs).
- Developed core modules for community moderation (posts, comments, reports, likes), consultation management (review/accept/reject requests), and dispute resolution between designers and clients.
- Implemented financial transaction management ensuring accurate billing distribution, alongside detailed profile views and activity tracking for all platform users.
- Tech: React, React Router, Axios, Formik , Yup, Shadcn UI, Tailwind CSS, i18next, Date-fns, Lucide React, React Hot Toast

Breakinpoint website

- A responsive website built for Breakingpoint, a student activity at Mansoura University's Faculty of Engineering.
- Gained hands-on experience integrating frontend with a real backend for the first time, strengthening skills in API integration and frontend-backend collaboration.
- Developed key forms for team recruitment applications and event registration for activities organized by the team.
- Tech Stack: React , React Router, Axios, Joi, React Toastify, React Select, Font Awesome

Full Stack Doctor Appointment System [↗](#)

- Built a full-stack Doctor Appointment System where I handle both backend and frontend development.
- Implemented multi-method authentication (Email/Password, GitHub & Google OAuth) with Passport.js
- full appointment booking logic, data validation, password recovery via email, image upload with Cloudinary.
- Built the frontend independently, delivering a responsive user interface with structured routing, global state management, and form validation.
- Frontend: React , React Router, Redux Toolkit, Joi, React Toastify.
- Backend: Express Validator, Passport.js, Bcrypt.js, Multer, Cloudinary, Nodemailer, Swagger, MongoDB.

Full Stack Task Manager [↗](#)

- A full-stack Task Manager app where each user can manage their own tasks with image upload support.
- Implemented complete CRUD operations for tasks, including the ability to mark tasks as completed and developed a secure authentication system with Login and Register functionality.
- Frontend: React, React Router, TanStack React Query, Formik & Yup, Shadcn UI, Tailwind CSS, React Hot Toast.
- Backend: Node.js, Express , MongoDB , Mongoose, JWT , Bcryptjs, Cloudinary , Multer, Express Validator.

Learning Management System [↗](#)

- A student-focused Learning Management System with secure authentication, allowing students to access courses, track progress, and manage their profiles.
- Tech: React, React Router, Redux Toolkit, Clerk, Quill, React YouTube, RC Progress, React Toastify

Skills

Frontend : HTML, CSS, JavaScript, TypeScript, Component Library Development React.js, Next.js, State Management , Redux, Redux Toolkit, React Query, Component Architecture, Tailwind CSS, Shadcn UI, Internationalization i18n, Agora, Form Validation , Joi , Yup

Backend : Node.js, Express.js, MongoDB , Mongoose, Cloudinary, Multer, REST APIs

Tools & Others : Git, GitHub, C++, Debugging , Performance Optimization, Problem Solving
